Scientific Database > Access Type

The screenshot shows a web browser window with the address bar displaying `library.iliauni.edu.ge/en/scientific-online-databases/`. The page lists four scientific databases, each with a logo, a description, and a set of links for access and guides. The 'Access from University' link for ProQuest is highlighted with a blue box.

Scopus
Scopus – Scopus is an electronic database which incorporates bibliographic data, abstracts and citation indicators since 1995. It includes 21000 scientific magazine titles of more than 5000 publishers, more than 50 million records in total.
[Detailed description](#) | [Access from University](#) | [Access outside the University](#) | [Guides](#) | [Trainings](#) | [Ask a librarian](#)

THOMSON REUTERS
Iliia State University offers its readers to use two important products of Thomson Reuters's electronic database since 1st may, 2013. These are **Web of Science** and **Journal Citation Reports**. It is important to note that Iliia State University is the only authorized user of Thomson Reuters electronic database in Georgia.
[Detailed description](#) | [Access from University](#) | [Access outside the University](#) | [Guides](#) | [Trainings](#) | [Ask a librarian](#)

ProQuest
The library includes diverse spectrum of studies: business, political sciences, fiction, psychology, medicine and social sciences, art, history, etc. It also offers access to wide range of popular academic subjects and contains more than 5,000 academic journal titles, specific publications (Entertainment Weekly, The Hollywood Reporter, Variety) and diversified list of newspapers – full texts among them.
[Detailed description](#) | [Access from University](#) | [Access outside the University](#) | [Guides](#) | [Trainings](#) | [Ask a librarian](#)

IMF eLIBRARY
International Money Fund (IMF) is an electronic resource that provides access to its periodicals, books, working documents and researches as well as to analysis of statistical data. (IMF) gathers resources concerning macroeconomics, globalization, trade, subsidies as well as technical support, demography, developing countries, overcoming poverty etc.
[Detailed description](#) | [Access from University](#) | [Access outside the University](#) | [Guides](#) | [Trainings](#) | [Ask a librarian](#)

On the right side of the page, there is a vertical social media sharing bar with icons for Facebook, Twitter, and Google+. At the bottom right, there is a small upward-pointing arrow icon.

Ilia State University Library

Basic Search Tips

- Search across all **ProQuest** platform databases with the Basic Search. To search for an exact phrase, use "**quotation marks**" around your search.
- When running a search, the search default is set to **Anywhere**. **Anywhere** searches the full bibliographic record (all indexed fields) including the ProQuest full text. Checking the **Full text** limit will restrict your search to only search and retrieve records containing full text from ProQuest.
- Checking the **Peer reviewed** limit will restrict your search to only search and retrieve records that are indexed in peer reviewed journals. Peer reviewed journals are a subset of scholarly journals and are defined as journals that undergo a review process where other experts (peers) in the field review the work before it is published in the journal. Peer reviewed journals are also commonly known as refereed journals.
- Checking the **Scholarly journals** limit will restrict your search to only search and retrieve records that are indexed in scholarly journals. Scholarly journals are journals that are intended for an academically oriented audience.

The Advanced Search Form

The screenshot displays the ProQuest Advanced Search interface. At the top, the ProQuest logo is on the left, and navigation icons (folder, user, help) are on the right. Below the header, a grey bar contains 'All databases', 'ProQuest Research Library', and links for 'Basic Search', 'Advanced Search', 'Publications', and 'About'. The main section is titled 'Advanced Search' with sub-links for 'Thesaurus', 'Field codes', and 'Search tips'. A search bar with a dropdown menu (labeled 1) is followed by a second search bar with a dropdown menu (labeled 2). Below these are 'AND' and 'OR' operators. A 'Limit to:' section includes checkboxes for 'Full text', 'Peer reviewed', and 'Scholarly journals'. A 'Publication date:' dropdown menu (labeled 3) is set to 'All dates'. A 'More search options' section (labeled 4) contains three columns of checkboxes for 'Source type', 'Document type', and 'Language'. A 'Sort results by:' dropdown menu (labeled 5) is set to 'Relevance'. An 'Items per page:' dropdown menu is set to '20'. A 'Duplicates:' section includes a checkbox for 'Include duplicate documents'. Two 'Search' buttons and 'Clear form' links are located at the bottom right of the form.

Advanced Search Tips

- **1. Advanced Search**
- When running a search, the search default is set to **Anywhere**. **Anywhere** searches the full bibliographic record (all indexed fields) including the ProQuest full text.
- **2. Limit to: Full text, Peer reviewed, Scholarly journals**
- **Full text, Peer reviewed, and Scholarly journals** are the first limits that appear in the Advanced Search.
- Checking the **Full text** limit will restrict your search to only search and retrieve records containing full text from ProQuest.
- **3. Publication Date**
- The **Publication Date** defaults to search all dates. Other options include Last 7 days, Last 30 days.
- **4. More Search Options**
- The **Source type** limit refers to the publication type. All are unchecked by default and if you leave them as such when you run your search, all source types will be included in your search.
- The **Document type** limit is used to refer to the format of the full-text. This includes articles, blogs, books, company profiles, industry reports, market research, and many others.
- The **Language** limit is used to restrict your search to documents published in one or more languages.
- **5. Display Options**
- The **Sort results by** menu controls the sort order of the records that appear in the results page. Sort by relevance, date (oldest first), or date (most recent first).
- **6. Thesaurus**
- The **ProQuest Thesaurus** is used to index the subject field in many **ProQuest** databases. The **thesaurus** allows you to find subject terms to narrow or broaden your search.
